MATERIAL SAFETY DATA SHEET

Section 1 - Material Identity

Product Trade Name(s): WG-325

Common Names(s): Ground Mica, Ground Muscovite Mica, Ground Potassium Aluminum Silicate

Chemical Formula: KAJ2SiO3O10(OID2 5H2O

CAS Number: 12001-26-2 Physical Form: White powder

HMIS Ratings

Health Hazard 1
Flammability Hazard 0
Reactivity Hazard 0
Max. Personal Protection E

Manufacturer's Name & Address:

IMERYS Pigments & Additives Group, 100 Mansell Court Fast, Suite 300;

Roswell, GA 30076

Emergency Telephone: (800) 424-9300 CHEMTREC

Section 2 - Ingredients and Hazards

Ingredient	Wt. % (Approx.)	CAS No.	OSHA PEL*	ACGIH TLV*
Ground Mica	80 95%	12001-26-2	20mppef	3 mg/m3 Resp.
Crystalline Silica, Quartz	<5%	14808-60-7	0.1 mg/m3 Resp.	0.025 mg/m3 Resp.
Kaolin - Al2Si2O5 (OH)4	$\sim 10^{o} m co$	1332-58-7	5 mg/m3 Resp.	2mg/m3 Resp.
Feldspar - (Na,K,Ca)AlSi3O8	< 10%	68476-25-5	5 mg/m3 Resp.	2 mg/m3 Resp.
Water	<1%			

^{*} Unless otherwise noted, all PEL and TLV values are reported as 8 hour time weighted averages (TWA).

Section 3 - Hazards Identification and Cautions

Appearance: White powder.

Primary Routes of Entry: Skin contact, skin absorption, eye contact, ingestion: Hazard Classification - None. (Historical basis for classification).

Target Organs: Eye, skin and lungs.

Medical Conditions Aggravated by Exposure: Skin contact may aggravate existing dermatitis. Breathing excessive quantities of ground mica dust may aggravate pre-existing respiratory conditions.

Potential Health Effects:

Eye Contact: This product may produce irritation upon contact with the eye. See also Section 4 below.

Skin Contact: Prolonged or repeated exposure may cause skin irritation. Ground mica is not expected to be absorbed through the skin in harmful amounts or to produce an allergic skin reaction. See also Section 4 below.

Ingestion: No adverse effect is expected. If ingested, seek medical advice. See also Section 4 below.

Inhalation: Inhalation of excessive quantities of ground mica dust may irritate the respiratory tract. See also Section 4 below. Subchronic, Chronic: None expected. No applicable information was found concerning any potential health effects resulting from

subchronic or chronic exposure to ground mica.

This product typically contains crystalline silica (quartz sand) above 0.1% as a naturally occurring impurity. The International Agency For Research on Cancer has concluded that "crystalline silica inhaled in the form of quartz or cristobalite from occupational sources is carcinogenic to humans (Group I)." It also noted that carcinogenicity was not detected in all industrial circumstance studies, and may be dependent on external factors affecting its biological activity or distribution of its polymorphs. (See IARC Monographs on the Evaluation of Carcinogenic Risks to Humans, Volume 68 (1997).) Exposure to respirable silica has also been associated with silicosis, seleroderma and nephrotoxicity.

(See Occupational Lung Disorders, Third Edition, Chapter 12 (1994) and American Journal of Respiratory and Critical Care Medicine, Volume 155, pp 761-765 (1997).)

Extinguishing Media: Product will not burn. Flammable: 0

Section 5 - Fire Fighting Measures

Section 6 - Accidental Release Measures Vacuum, pump or scoop spilled material into containers for reclaiming or disposal. Use proper respiratory and personal protective equipment. MSHA/NIOSH or OSHA/NIOSH approved respirator recommended. Spilled materials may cause slippery conditions when wet. Care should be exercised when walking on spills on floors or concrete pads. No neutralizing chemicals required. Material

Section 7 - Handling and Storage Storage in a cool, dry location is recommended. Keep away from acids. Spilled materials may cause slippery conditions when wet Care should be exercised when walking on spills on floors or concrete pads. Minimize dust generation & accumulation. If excessive dust is generated, provide adequate ventilation and use proper respiratory and personal protective equipment,

Section 8 - Exposure Control/Personal Protection

Follow good industrial hygiene practices. Wash affected skin areas thoroughly with soap and water. Seek

Follow good industrial hygiene practices. If excessive exposure by inhalation is suspected, remove to fresh air. If necessary, a MSHA/NIOSH or OSHA/NIOSH approved respirator is recommended. Seek medical aid

Follow good industrial hygiene practices. If ingested, do not induce vomiting. If conscious, drink two glasses

with all local, state and federal requirements.

Section 12 - Toxicological Information

Muscovite Mica - CAS No. 12001-26-2

Primary Route of Exposure: X Skin; X Eye Contact; X Inhalation; X Ingestion

Acute Health Hazards:

Eye contact may cause mechanical irritation.

Skin contact may aggravate existing dermatitis.

Inhalation from prolonged and continuous exposure to excessive quantities of dust may aggravate existing asthmatic or respiratory conditions

Chronic Health Hazards*:

Carcinogenicity*; NTP? No IARC? No. OSHA? No.

Mutagenicity: None known Teratogenicity: None known Reproductive Effects: None known

Section 13 - Transport Information

EPA Waste Number: Not Regulated

DOT Classification: Not Regulated DOT/IMO Classification: Not Regulated

Internal UN: Not Regulated

Section 14 - Regulatory Information

SARA Title III Section 302 Extremely Hazardous Substances: This product does not contain extremely hazardous substances subject to the reporting requirements of Section 302 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 355. SARA Title III Section 311 and 312 Health and Physical Hazard Categories per 40 CFR 370.2:

Immediate Delayed Pressure Reactivity Fire Yes No No

SARA Section 313 Notification: This product does not contain toxic chemicals subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372.

TSCA: Product is listed in Initial Inventory, Vol. 1, Appendix A, CAS No. 12001-26-2.

The International Agency for Research on Cancer has concluded that "crystalline silica inhaled in the form of quartz or cristobalite from occupational sources is careinogenic to humans (Group I)." It also noted that carcinogenicity was not detected in all industrial circumstance studies, and may be dependent on external factors affecting its biological activity or distribution of its polymorphs. (See IARC Monographs on the Evaluation of Carcinogenic Risks to Humans, Volume 68 (1997).) Exposure to respirable silica has also been associated with silicosis, scleroderma, and nephrotoxicity. (See Occupational Lung Disorders, Third Edition, Chapter 12 (1994) and American Journal of Respiratory and Critical Care Medicine, Volume 155, pp 761-765 (1997).)

WARNING: This product may also contain extremely small amounts of one or more naturally-occurring materials known to the State of California to cause cancer, birth defects, or other reproductive harm.
